## Universal Fuel Rail Hose Kit Instructions

For 103150, 101150, 101110 & 103110

Choose the correct colored adapter (see below) for application. Hand thread adapter into banjo extension with longest length of thread going into banjo extension. CAUTION, INSTALLING WRONG END INTO CARB CAN RESULT IN THREAD DAMAGE TO CARB OR ADAPTER.

Select correct sealing washer (see below for applications) and install onto adapter. Hand tighten banjo extension assembly into carb.

Remove nuts and brass ferrules from banjo fitting and save for final installation.

Install banjo and bolt w/o TEFLON® seals. Measure distance between the beginning of threads of banjo fitting (where the brass ferrule goes). Measure hose; tightly wrap hose with electrical or other suitable tape at location. Re-measure hose and mark. At this point it is easiest to slip nuts in appropriate direction before cutting hose as it will fray. Cut hose with abrasive saw or cut-off wheel. Remove banjos and banjo bolts.

Install hose to banjos. First take compression nut off of banjo and slide onto hose before you cut hose to length, then brass ferrules are slid over the TEFLON® inner lining and underneath braid (shown in picture below). Now insert the banjo barb down thru the ferrule and TEFLON® hose. To finish, slide nut up to banjo threads and tighten. Wait to fully tighten nuts to banjos until banjos have been reinstalled into carb. Reinstall banjos using TEFLON® seals. Torque banjo bolts to approximately 6-8 lbs. Tighten nuts to secure hose. Use only -6 TEFLON® hose for feed line to fuel rail (not supplied in kit). Our Part # is 101006 for fuel hose sold per foot.

AFTER INSTALLATION VERIFY THAT THERE ARE NO LEAKS IN THE FUEL SYSTEM. GOTTA SHOW PRODUCTS ASSUMES NO LIABILITY FOR IMPROPER INSTALLATION OF HOSE TO BANJOS, AS IT WILL LEAK.

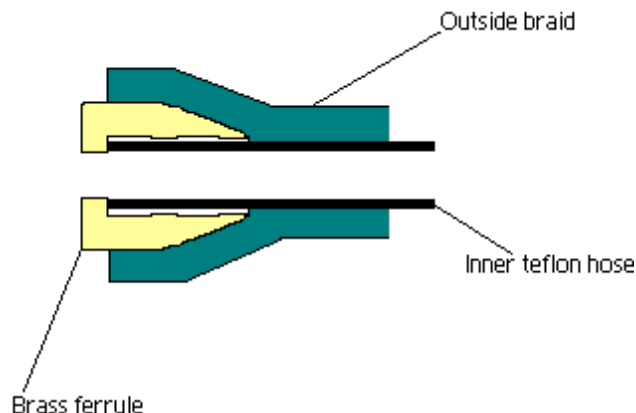

### Adapter / Sealing Washer Applications

Demon Carbs- Silver Adapter & Metal Sealing Washer @ Carb

Holley Carbs- Black Adapter @ TEFLON® Sealing Washer @ Carb

Edelbrock Carbs- Gold Adapter @ TEFLON® Sealing Washer @ Carb

Use TEFLON® Sealing Washers at both sides of Banjos

**\*\*\*\* INNER TEFLON AND OUTER BRAID SHOULD BE THE SAME LENGTH AFTER CUTTING!!!!**
